

● 2020

Andria (BT)

Plant size: 500 kWel

## SUBSTRATE

100% olive pomace

## DESCRIPTION

Agresti family business, active in olive oil production. The uniqueness of the plant lies in its being one of the first in Europe to be 100% fueled with the organic material resulting from olive pressing and, therefore, in its ability to handle the pomace anaerobic fermentation process. The efficiency and functionality of the plant are guaranteed by constant surveys and innovative solutions to enable the optimal “digestion” of olive oil production waste.

## USE OF BIOGAS

Production of electricity and heat

## USE OF DIGESTATE

It re-enters the olive plant production cycle, helping to improve quality and quantity.
