

S. AGOSTINO AGRICULTURAL COMPANY

2020

Casaloldo (MN)

Plant size: 100 kWel

SUPPLY

100% with slurry and manure

DESCRIPTION

Company in the Zanella Group dedicated to agricultural activity and cattle breeding.

Small plant, 100 kW, powered only by animal waste. In the design phase it was necessary to build a bespoke plant by exploiting the limited space available and enhancing two storage tanks that were already present.

USE OF BIOGAS

Production of electrical and thermal energy

USE OF DIGESTATE

It is part of the vegetable cycle of agricultural production helping to improve quality and quantity
