

Are you the owner of a biogas plant which is at the end of the 15-year incentive rate?

You may be wondering how to make the most of your investment and we can help you decide how to face the future.

REVAMPING

BTS Biogas is available to convert your existing plant by adapting it to the new regulations.

What are the benefits for your company?

Achieve **continuity** with regard to your previous investment and **ensure a sustainable future** with biomethane.

If you wish to find out more about this opportunity, we can do the following for you and with you:

- Submission of an offer that is tailored to your needs
- Development of a Business Plan
- Complete authorisation process
- Analysis of by-product yields using our MetanLab and our team of biologists
- Verification of the yield and re-development of a new power supply solution
- Verification of the sustainability criteria

SELLING

Have you decided not to renew your system? BTS Biogas is interested in purchasing it.

What does this mean for your company?

Get a significant amount of capital right away, without having to make additional investments and manage the business for 15 years.

If you wish to find out more about this opportunity, we can do the following for you and with you:

- Analysis of the operational state of the system
- Verification of the feasibility of connection to the gas network (distance and inlet pressure)
- Analysis of the Business Plan based on the current regulations (best and worst case)
- Verification of the yield of a potential new power supply solution
- Verification of the sustainability criteria
- Support for accessing eligible contributions
- Signing of a potential letter of intent or contract

BTS

We therefore invite you to a working group to verify which advantages you could obtain based on your needs.

Contact us on +39 348 31 78 956 or write to us via e-mail at B.Blankespoor@bts-biogas.com to make an appointment and allow us to present our solutions.
