BWT

BWT Group -Best Water Technology- is Europe's leader in water technology, continuously pursuing its research to develop innovative, cost-effective and eco-friendly solutions to provide households, industries, businesses, hotels and municipalities with the safest and highest quality water for every daily need. Sustainability is part of BWT DNA, and every product contributes to the preservation of the most precious resource, water. Thanks to its unique and patented technologies, BWT contributes every day to "Change the world, sip by sip" through the development of the "Bottle Free Zone" project, which reduces our carbon footprint in the long term.

Coalma

The tuna of the Sicilians celebrates its 100 year anniversary by focusing on sustainability.

Years go by, yet the traditional processing of first choice tuna is unchanged, with a recipe that has never been modified through the time-honored cooking method in water and sea salt which ensures an outstanding quality product and the whole fish fillet. With the same passion, we strongly believe in sustainable fishing and are "Friend of the sea" certified.

On the occasion of the prestigious centennial milestone in 2022, the company supports the [Sea Turtle Rescue Center in Lampedusa](#) by documenting the activities of volunteers and activating an awareness-raising process for the protection of turtles, whose lives are often endangered by illegal fishing practices and by the plastic present in our seas. For further information.

Farina

The Farina winery, currently managed by Elena and Claudio Farina, is one of the most active and representative companies of the Valpolicella winemaking world, an area dedicated to the production of noble wines. In its over one-hundred years of history, the winery has consolidated an international reputation and authority. The historical headquarters of the winery are located in Pedemonte, in the heart of the Valpolicella viticultural region. The Farina company is deeply connected with its territory, its valorization and promotion. Its philosophy, in fact, is based on the strong belief that traditions should be respected, starting with the care of the vineyards, to the methods of "appassimento" (grape drying) and "affinamento" (natural wine aging in oak barrels). At the same time, the owners of the winery believe that it is necessary to experiment in different fields to reach increasingly higher levels of quality.

Pastificio Mozzo

Pastificio Mozzo is a young company that places the research and selection of raw materials and their respect during all stages of the production process at the center of its commitment. The company is managed by Serena, Gianluca and Debora, the newest generation of the Mozzo family, united in their private life – they are, in fact, siblings – as well as in their working life. For thirty years they have nurtured their ambitious entrepreneurial spirit by developing their business in the furniture and food fields. Pasta Mozzo is made exclusively from Italian grains, the origin of the raw materials is guaranteed and complies with the strict regulations in place to safeguard the Made in Italy. Made of sun, water and Italian wheat.

Tao

Tao Technologies is an Italian company specializing in the manufacturing of innovative nanotechnology devices for the treatment of motion disorders and proprioceptive improvement. Founded in 2012 from a collaboration of individuals with the same prevention objective, brought together by Dr. Fabio Fontana in the designing, diffusion and development of Taopatch®, which belongs to class I EU medical devices. This revolutionary technology works through wavelengths of scientifically proven therapeutic light, stimulating and enhancing communication between the Central Nervous System and the bodies receptors without releasing chemicals or causing side effects. With millions of units sold and thousands of Taopatch® certified healthcare professionals, Tao Technologies is one of the

leading companies in biophysics that is applied to medicine. For further information, please visit www.taopatch.com/
